

The background of the entire page is a soft-focus photograph of a person's head and neck. A hand is visible on the right side, gently holding the person's head. The person's eyes are closed, and their expression is calm. The lighting is bright and natural, creating a professional and serene atmosphere.

# The Shoulder

## Theory and Praxis

### with Dr. Jeremy Lewis

Consultant Physiotherapist | Professor of Musculoskeletal Research | Sonographer | Independent Prescriber

4 & 5 September 2018, Basel Switzerland

A biopsychosocial approach for the assessment and management of musculoskeletal conditions involving the shoulder region. Taught worldwide in over 30 countries, this course is continually updated, integrating the latest research evidence.

Jeremy Lewis is one of the leading shoulder experts and a great teacher!

## Course content

- Epidemiology & the impact of shoulder pain
- Anatomy, biomechanics, function & the kinetic chain
- Assessment and the dilemma of diagnosis "Rotator Cuff related Shoulder Pain"
- Treatment, rehabilitation and management
- Sensory-motor control
- Frozen shoulder: evidence based diagnosis and treatment
- Patient presentations and case studies

## Participants comments

„Complete change to the way I think about shoulders. Best course I have ever done“

„Fantastic course as example of how to treat within the biopsychosocial model. A very competent and relevant approach with respect to where physiotherapy is at currently. The shoulder provides the topic but the clinical processing could be applied elsewhere. I don't think anyone is teaching such a balanced approach currently“

“Thank you, thank you, fantastic, great teaching style, great sense of humour”

„Excellent presentation style. Enjoyed lectures and practical sessions. Very impressed with depth and breadth of knowledge and how well it relates to clinical practice.“
